However, some figures and Supplemental Material published in *EHP* articles may not conform to [508 standards](#) due to the complexity of the information being presented. If you need assistance accessing journal content, please contact [ehp508@niehs.nih.gov](mailto:ehp508@niehs.nih.gov). Our staff will work with you to assess and meet your accessibility needs within 3 working days.

## **Supplemental Material**

### **Estimating Inorganic Arsenic Exposure from U.S. Rice and Total Water Intakes**

Madhavi Mantha, Edward Yeary, John Trent, Patricia A. Creed, Kevin Kubachka, Traci Hanley, Nohora Shockey, Douglas Heitkemper, Joseph Caruso, Jianping Xue, Glenn Rice, Larry Wymer, and John T. Creed

#### **Table of Contents**

<b>Censoring of the Second Six Year Review Database for Arsenic in Drinking Water .....</b>	<b>3</b>
<b>Rice Sampling Protocol .....</b>	<b>4</b>
<b>Table S1.</b> A summary and comparison of databases used in the literature to simulate arsenic exposure in the U.S. population.....	<b>5</b>
<b>Table S2.</b> Total and speciated arsenic for U.S. consumption weighted composites of imported rice using a mass balance approach after a DNAS.....	<b>7</b>
<b>Table S3.</b> Total and speciated arsenic for U.S. consumption weighted composites of domestic rice using a mass balance approach after a DNAS.....	<b>8</b>
<b>Table S4.</b> Total and speciated arsenic for U.S. consumption weighted composites of imported rice using a mass balance approach after an <i>in vitro</i> gastrointestinal extraction assay .....	<b>10</b>

<b>Table S5.</b> Total and speciated arsenic for U.S. consumption-weighted composites of domestic rice using a mass balance approach after an <i>in vitro</i> gastrointestinal extraction assay.....	11
<b>Table S6.</b> Summary statistics of one-day rice consumption rates for the U.S. population and both ethnic- and age-based subpopulations. <sup>a</sup> .....	13
<b>Table S7.</b> Comparison of one-day and long-term rice consumption rate estimates in the U.S. population based on WWEIA short-term survey data and NHS, NHS II, and HPFS long-term survey data.....	14
<b>Table S8.</b> Summary statistics of iAs exposure from cooked rice using a gastrointestinal extraction procedure for the U.S. population and both ethnic- and age-based subpopulations. ....	16
<b>Table S9.</b> Summary statistics of iAs exposure from cooked rice using the DNAS procedure for the U.S. population and both ethnic- and age-based subpopulations.....	17
<b>Figure S1.</b> Cumulative Density Function Plots for total water consumption (mL/day and mL/kg BW-day) for U.S. population and children 1–2 years old. <sup>a</sup> .....	18
<b>Figure S2.</b> Flowchart and equations used by the SHEDS model to convert WWEIA food items into Food Commodity Intake Database Raw Agriculture Commodities used to estimate iAs exposures.....	19
<b>Figure S3.</b> Correlation of grain-specific DMA concentrations in U.S.-consumed rice determined after DNAS and gastrointestinal-based extractions. ....	22
<b>Figure S4.</b> Cumulative Density Function Plots of rice consumption (g/day) for U.S. population and ethnic subpopulations. <sup>a</sup> .....	23
<b>Figure S5.</b> Cumulative Density Function Plots of iAs exposure (µg/day) from rice, water used to cook rice, and total water consumption for the 1–2-year-old U.S. subpopulation.....	24
<b>Figure S6.</b> Cumulative Density Function Plots of iAs exposures (µg/day) from cooked rice for 1–2-year-old children from different ethnicities using a gastrointestinal extraction procedure.....	25
<b>References</b> .....	26
